Addition bingo within 20

- For 2 to 8 players and one caller: each player takes a bingo card and some counters (beans or
- paper squares)
- The caller reads the sums from the caller's list one at a time, in any order, for example 8 +
- 5, and ticks each sum read
- If the answer is on your card, cover it with a counter: 8 + 5 = 13
- The first player to cover a full row, across or down, calls out Bingo!
- The caller checks that row against the ticked sums: if every answer is right, that player wins
